DETAILS

- **Heavy gas 150 PSI** is a **high pressure gas**, perfect for **GBBR** replicas requiring **high power** to cycle properly.
- It is also suitable for **GBB** replicas with a **temperature below 8°C**.
- It will be the binomial of your GBBR replicas, the ally of your **GBB** in cold weather, the companion of your **OPs**.
- Ideal gas for your **games in winter**, with very low temperatures where the operation of your replicas can be affected.
- A high quality and inexpensive gas.
- 2 versions are available :
 - **HEAVY GAS 150 PSI - NO SILICONE**: ideal for those who prefer field performance. Requires however a more rigorous maintenance of your replicas. **#603513**
 - **HEAVY GAS 150 PSI - SILICONE**: lightly lubricated, just enough to avoid clogging the mechanics of your replica while sparing it as much as possible. **#603514**
