PRODUCT OVERVIEW

Discover the **Adapt-X level 3: the authentic and only rigid, universal and ambidextrous holster!**

Entirely **designed and developed in France**, it features **two active retention system**. Its "level 3" locking system ensures the holding and retention of your replica.

Specially developed to be **compatible with more than 300 pistols replicas**, all you have to do is choose your favorite color!

Thanks to its **revolutionary screw adjustment system** and **polymer** material, the Adapt-X combines **adaptability and protection**. It will adapt to all of your replicas and will allow you to alternate between your favorites without having to change your holster model.

However, oversized replicas such as the Desert Eagle or revolvers will not be compatible.

ADAPT-X Level 3

DETAILS

The ADAPT-X is a universal holster that will easily adjust to most pistol replicas with a **simple screwdriver**.

Its serrated attachment allows you to rotate the holster in the position of your choice over 360°. This system allows you to optimize the positioning of the holster on your outfit for a better playing comfort.

Multiple positions of use: you will be able to fix your ADAPT-X in 8 different positions.

Delivered with a **rubber coated mounting plate** and a **circular extension**, you will be able to fix your holster on a belt or pants but also to lower it so that your tactical vest does not interfere with the unlocking of your replica.

Choosing the ADAPT-X holster means more versatility! Many accessories sold separately will allow you to fix it according to your outfit and/or your needs:

- **MOLLE fastening**
- **Thigh plate**
- **Mounting harnesses**

Active retention system

Gain in comfort of use and reactivity thanks to its active retention systems. The two locking systems allow a perfect holding of your replica not in one but in 2 points. No matter the conditions, your AP will not move! Thanks to it, you will be able to draw your pistol replica quickly in any situation. A simple press of the two retentions will release your airsoft/gun in a fraction of a second, while keeping your finger along the trigger guard.

Totally ambidextrous, the ADAPT-X is suitable **for both left and right handed users** thanks to its unique design. It takes only a few seconds to switch from one position to the other.
