DETAILS

- **Green gas 130 PSI**, is a **medium power gas**: it is suitable for replicas with a metal slide requiring more power to cycle properly at medium temperatures (12°C to 25°C).
- It will also be suitable for replicas of type GBBR with a light slide or at relatively high temperatures.
- It will be the binomial of your GBBR type replica in summer, the ally of your GBB, the companion of your **OPs**.
- Ideal gas for your GBBR **in summer** with high temperatures, and your GBB **in winter** with low temperatures.
- A high quality and inexpensive gas.
- 2 versions are available:
 - **GREEN GAZ 130 PSI - NO SILICONE**: ideal for those who prefer field performance. Requires however a more rigorous maintenance of your replicas. **#603511**
 - **GREEN GAZ 130 PSI - SILICONE**: lightly lubricated, just enough to avoid clogging the mechanics of your replica while sparing it as much as possible. **#603512**
